

EL PASO COUNTY DEMOCRATIC PARTY

VAN 101

Learn how to contact and keep data for your precinct voters using VAN and miniVAN

What are VAN and miniVAN?

VAN (aka Voter Action Network, aka Votebuilder) is the voter database and software tools Precinct Organizers use for voter outreach and organization. VAN is the software used by the entire Democratic Party in Colorado and many other states. Contains information on all registered voters in Colorado.

miniVAN is the companion smart phone or tablet app used for canvassing and data entry. miniVAN pulls data from VAN and then pushes updated data back to VAN.

You are
entrusted to
protect this
data

- **Confidentiality**
 - Contains personally identifiable information (PII) that could be used for marketing or identify theft
 - We are entrusting you to keep this information safe
- **Party Use Only**

- **Two-Factor Authentication**

- Requires access to two separate physical devices or software products
- Added security

Agenda

- Logging in to VAN
- Quick Look Up (looking up a single voter)
- Creating and saving a voter list using simple qualifiers (searching)
- Folders
- Cutting turf (breaking up lists for multiple canvassers)
- Contacting voters and entering results using existing lists and scripts
- Access levels: users, canvassers and administrators
- Managing canvassers using miniVAN (list number vs. VAN action ID)
- Data Entry in VAN (Grid View)

When Democrats vote,
Democrats Win!
Precinct Organizers make
it happen!

It's all about getting out the vote.
